

Set-up for ...

Microsoft new Windows Vista is said to be more secured from external attacks (hacks, virus and malware). Vista UAC or User Account Control monitors your installation and running of programs.

As the Juz Amma software accesses Windows system files, you will need to run the software in "Administrator" mode. By default, softwares are run on "User" mode.

In order to install and run properly the Juz Amma software on Windows Vista, please take note of the following procedure.

You will not be able to run the software properly if you fail to follow the instructions given.

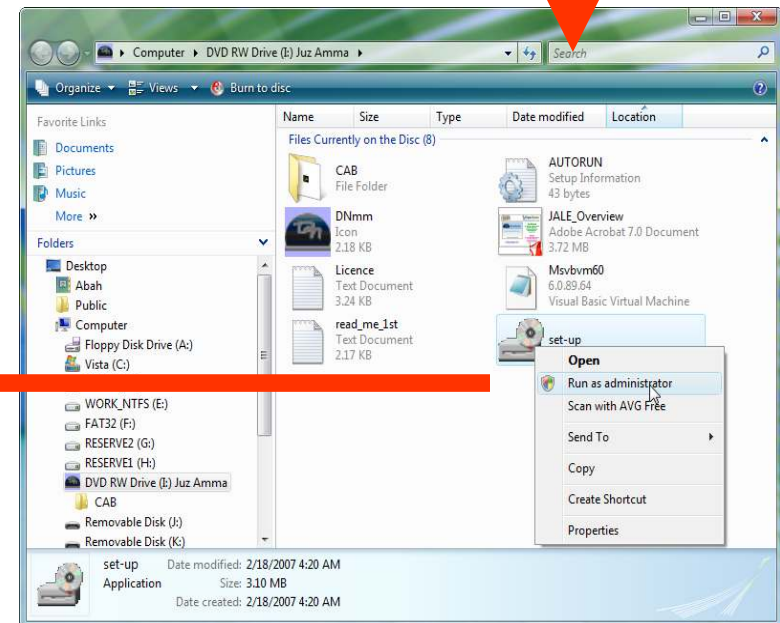

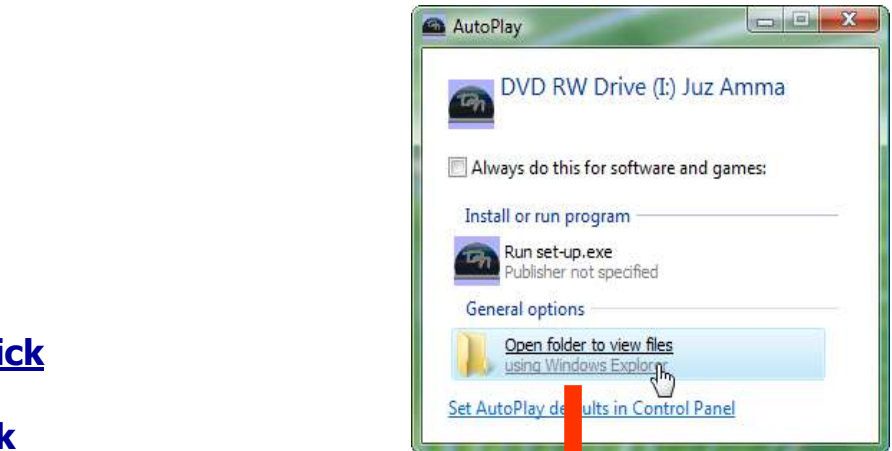

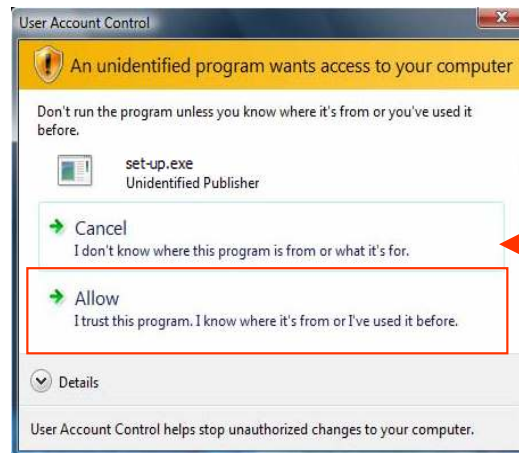

Set-up for ...

Installation Procedure

1. When you load in the Juz Amma CD in your CD-rom, the "AutoPlay" window will pop-up.
2. Click "Open folder to view files". Explorer window opens.
3. RIGHT mouse click on "set-up"
4. Mouse over to "Run as administrator" and LEFT mouse click
5. The UAC (User Account Control) screen will pop-up. Click "Allow".
6. Follow the rest of the set-up prompting.

This is a "one-time" activity for installing Juz Amma software.

Running on ...

Launching Program

1. Locate the Juz Amma icon on the Windows desktop
2. To run program, RIGHT mouse click on Juz Amma icon and "Run as administrator".
3. When prompted by the UAC pop-up, click "Allow" and program will now run properly.

You will need to do this every time you want to run the Juz Amma software.
